Kush Brahmbhatt

UI/UX Designer | Frontend Developer | Backend Developer

Information:

Gujarat, India

Phone No.: +91 95588 30905

Email: kushbrahmbhatt23@gmail.com

Languages I know: **Gujarati, Hindi, English**

Summary:

I bring a unique blend of technical proficiency and creative flair to the table. My academic journey includes a Bachelor's degree in Computer Applications (BCA) and partial completion of a Master's in Computer and Information Technology (MSCIT). Despite my academic pursuits, I've chosen a non-traditional path, embracing hands-on experience and real-world projects to refine my skills.

I'm passionate about developing smooth digital experiences, and I excel in front-end, back-end, and UI/UX design. I approach web development holistically because of my broad skill set, which includes ReactJS, NextJS, TailwindCSS, ShadcnUI, TypeScript, JavaScript, PHP, NodeJS, MongoDB, and MySQL. My area of expertise is creating user-centered interfaces that look amazing and work flawlessly. Whether it's developing effective backend solutions or constructing dynamic, responsive frontend applications, I relish the challenge of coming up with solutions that balance form and function. Let's get in touch and talk about how we can work together to make digital ideas a reality.
